1. The following is an examiner's statement of reasons for allowance: The claims have been allowed because claim 1 recites a machine for dispensing flat objects having a dispensing slot at the side of a cabinet containing the plurality of objects. There is biasing means to push the plurality of objects toward the front of the cabinet. Specifically, there is a drive helix having a helical feed groove so as to engage an edge of a lead carton of the flat objects and to urge it towards the front of the cabinet when the drive helix is rotated. There is an extractor to engage an edge of the lead carton to send it through the slot. Finally, there is a money accepting means and a control means to control the drive helix and the extractor. The structure in claim 1 and its interrelationship to each other and the handling of the object are not taught by the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Rachman is cited disclosing another type of vending machine for flat packages and utilizing a money accepting means.

Muto is cited showing in figure 3 a dispenser for flat objects 32 having a rotating discharge assistant 34.

It is also noted that applicant must respond to the Office of Petitions to correct the Oath in the letter filed on June 23,2003.
